BOOK SYNOPSIS

Incorporating introductions, readings, and cases that span the breadth of the discipline, *Contemporary Bioethics: A Reader with Cases* captures the spirit of bioethics as a rich, exciting, and continually evolving field. It covers all the essential topics - including abortion, reproductive ethics, end-of-life care, research ethics, and allocation of resources - and also extends into cutting-edge areas like environmental sustainability, terrorism, neuroethics, immigration, genetic manipulations, and links between first- and third-world health. The book opens with a substantial introduction that explores key differences between secular and religious modes of argumentation. Each of the following chapters contains an in-depth introduction, a selection of concise readings, discussion questions, and a collection of 7-10 case studies.
