BOOK SYNOPSIS

A highly flexible casebook focusing on core concepts and central controversies in evidence law. With well-selected and tightly edited cases, this casebook offers thoroughly up-to-date coverage of technical and jurisprudential developments in scientific proof. Specifically, the fourth edition contains a dozen new cases while also dropping older material made redundant by the additions. The author has replaced the Supreme Court's confrontation decisions in *Davis v. Washington* and *Michigan v. Bryant* with the Court's 2015 decision in *Clark v. Ohio*. The Court's 2012 decision in *Williams v. Illinois*, regarding confrontation and expert witnesses, has replaced *State v. Lewis*. And *Warger v. Shauers*, the Court's 2014 decision applying Federal Rule of Evidence 606(b), has pushed aside *Tanner v. United States* and *People v. Fleiss*.
