## BOOK SYNOPSIS

Interior architectural details, planning standards, and reference data, for use by architects, interior designers, space planners, facility managers, builders, and design students. Long recognized as one of the most comprehensive architectural and interior design reference resources and known as “the silver bible,” this new edition of Time-Saver Standards for Interior Design and Space Planning is an excellent source of easily accessible design criteria, planning standards, and technical guidelines. The vast array of design information, all contained in a single volume, facilitates and expedites the completion of programming, preliminary planning, design development, and working drawing services. This updated and revised edition of Time-Saver Standards for Interior Design and Space Planning serves as a primary source of information for all design professionals. Organized in an easily accessible format, the book contains key criteria useful to every design professional and builder involved in the planning of a large variety of interior projects. It includes, among other changes, entirely new sections dealing with healthcare spaces, hospitality spaces, banking spaces, conference centers, and accessible design, featuring the latest ADA design requirements. Moreover, many of the existing sections of the book have been significantly expanded to include such new material as design and planning criteria for video-conference spaces, as well as a host of additional lighting design details, workstation configurations, and reference standards.
